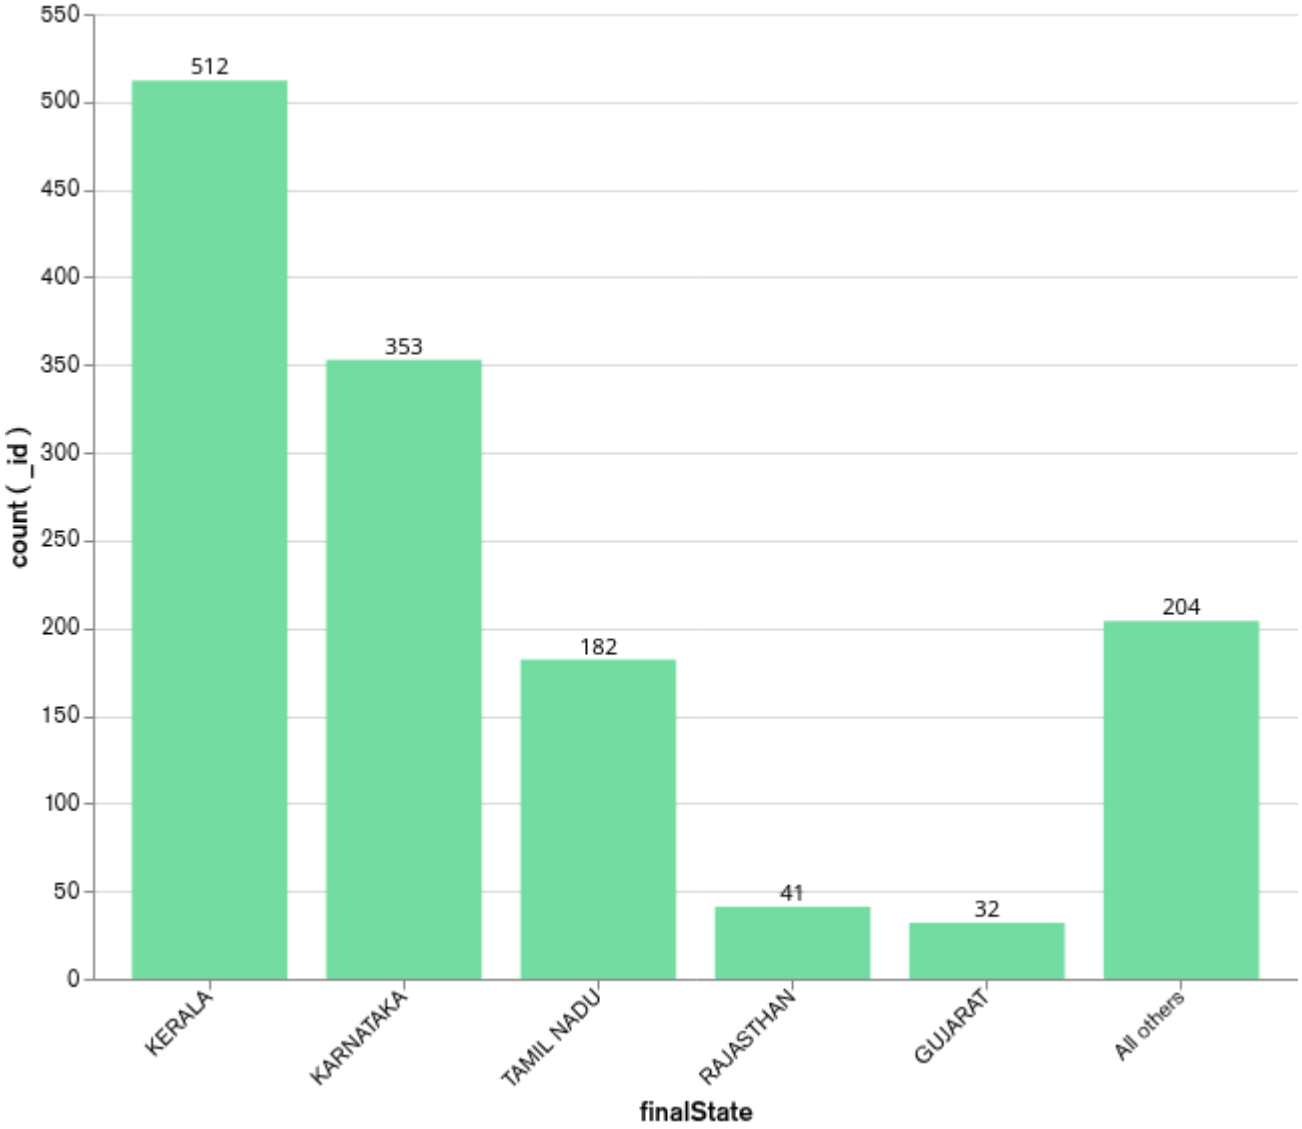
EV_Charging

Dashboard of Ev charging stations in India

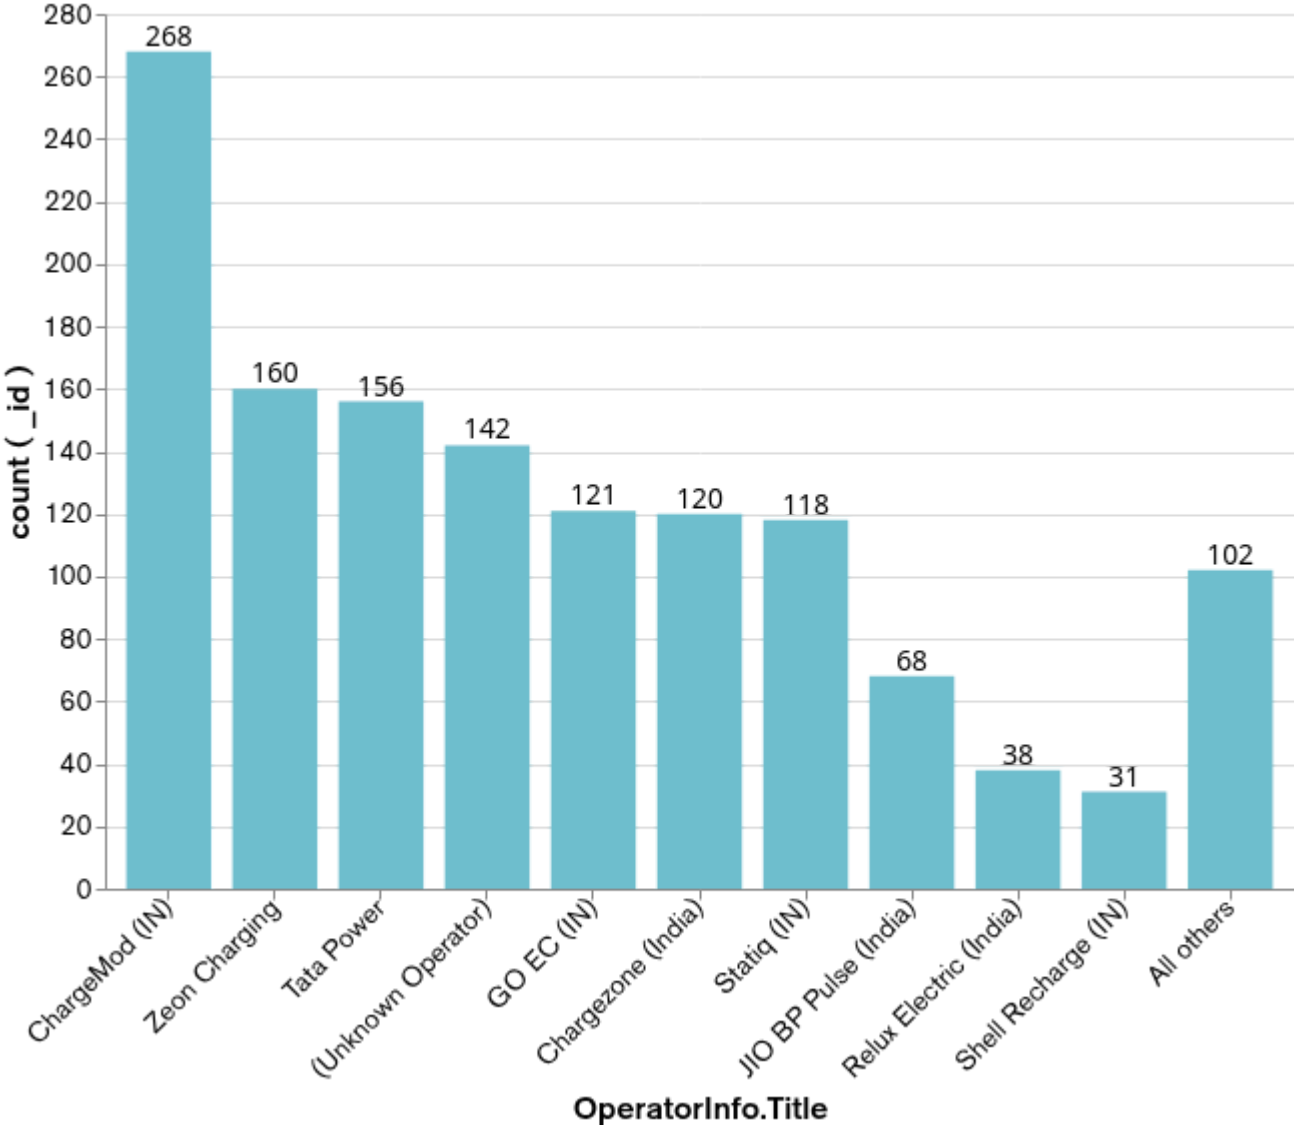
EV Charging Stations by State

Distribution of EV charging stations across Indian states after multi-stage data normalization and corre...



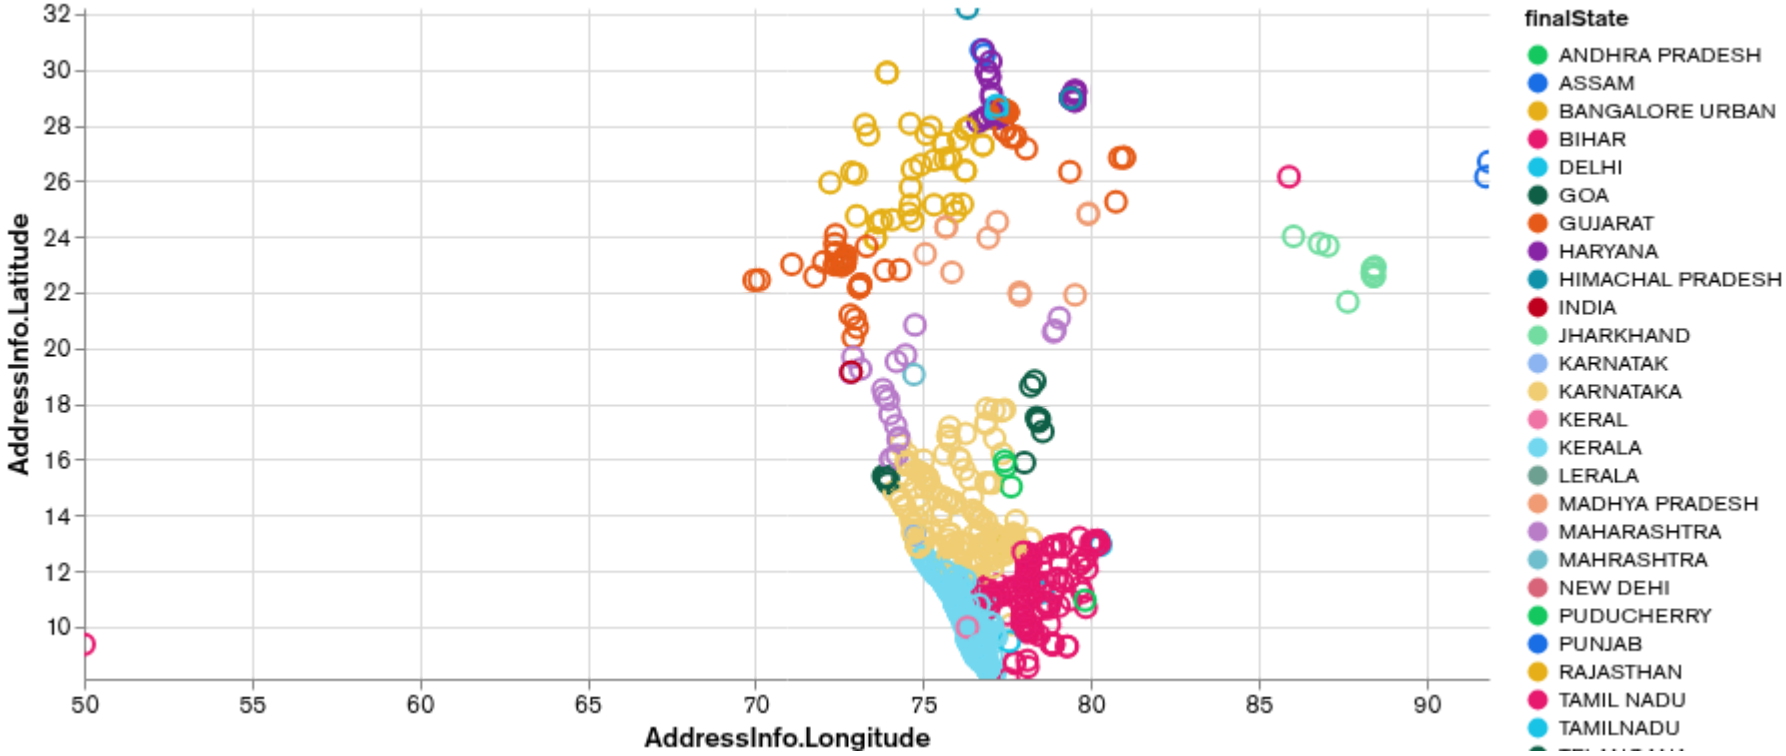
EV Charging Stations by Operator (Market Share Analysis)

Top operators ranked by total charging stations. Includes long-tail distribution grouped under “All others.”



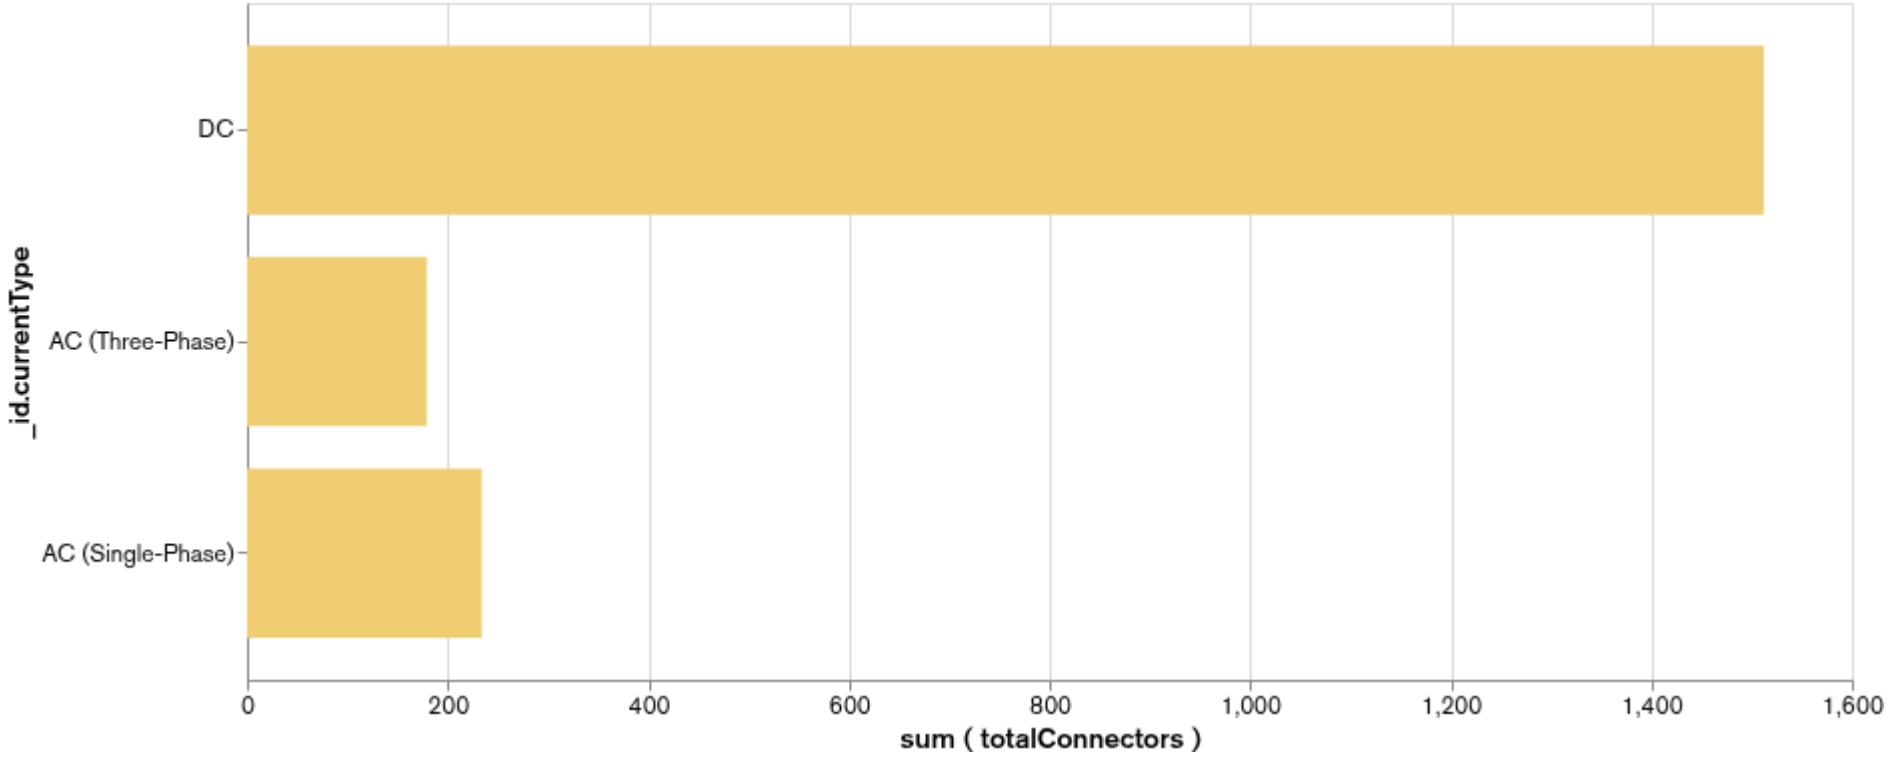
Spatial Distribution of EV Charging Stations in India

The plot highlights geographic clustering, with visibly higher station density across southern states .



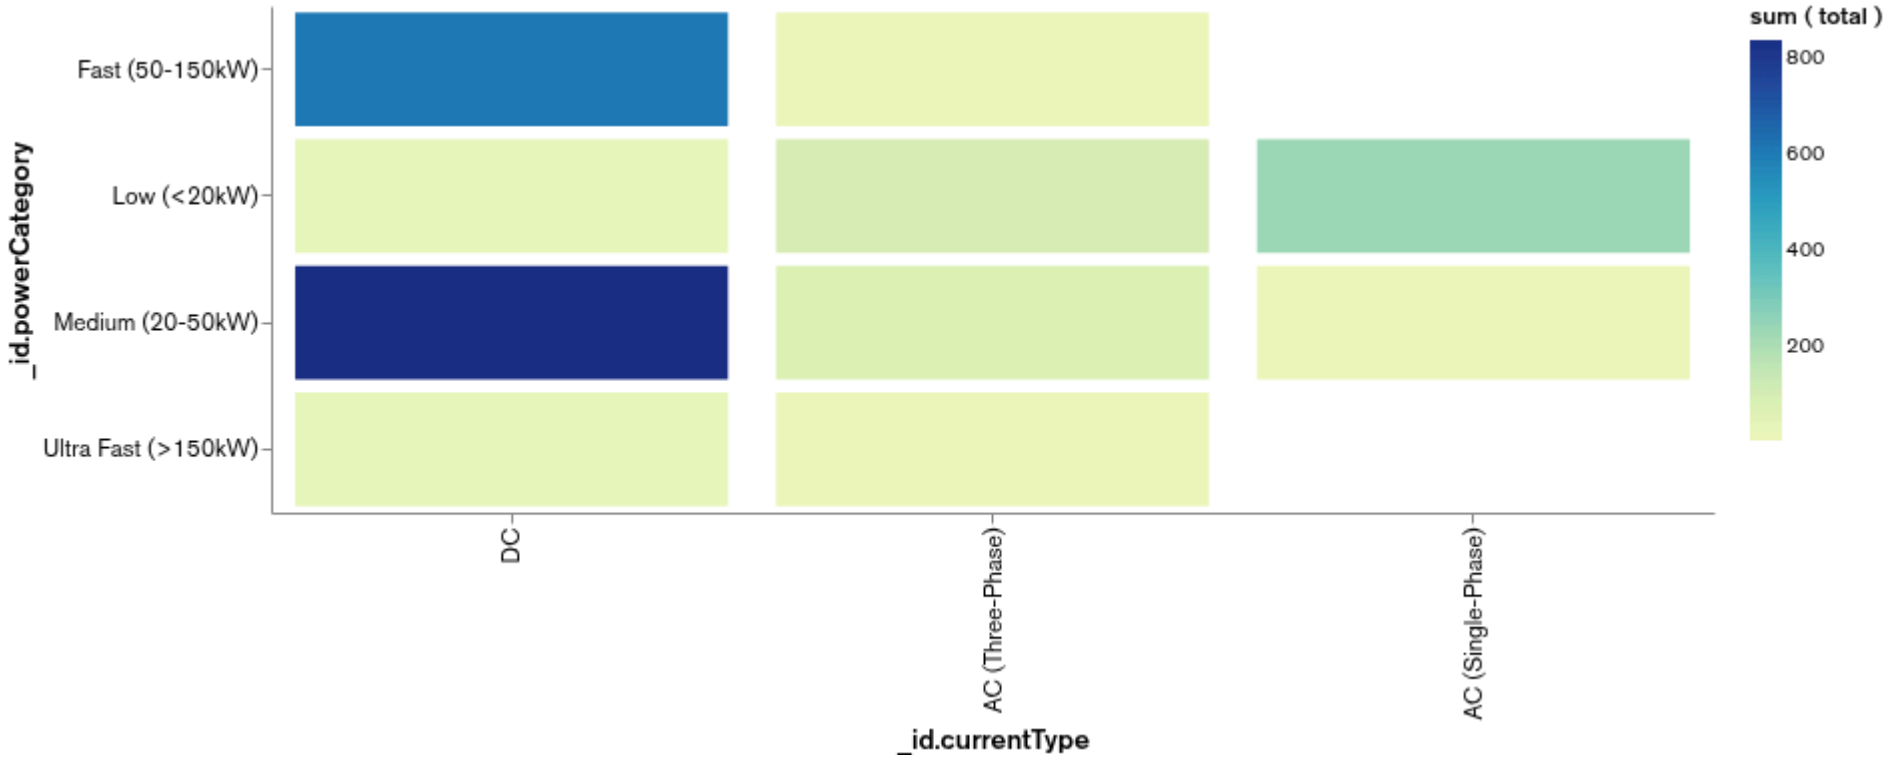
Connector Type Distribution and Average Power Rating

Distribution of EV charging connectors by current type (AC/DC) with corresponding average power ratings, indicating infrastructure maturity.



EV Charging Infrastructure Power Maturity Matrix

Matrix visualization of connector types across power categories, illustrating infrastructure maturity and fast-charging penetration trends.



Total EV Charging Stations in India

Total number of operational EV charging stations captured in the dataset.

1,324

Leading State in EV Charging Infrastructure

State with the highest concentration of EV charging stations.

_id

KERALA

Market Leader in EV Charging Infrastructure

Operator with the highest number of EV charging stations across India.
